ENGINEERING & CONSTRUCTIONS

The creative engineering to design or develop structures, machines, apparatus, or manufacturing processes, or works utilizing them singly or in combination; or to construct or operate the same with full cognizance of their design; or to forecast their behavior under specific operating conditions; all as respects an intended function, economics of operation and safety to life and property

Build is an accepted practice that is gaining popularity, as it can provide significant cost and time savings for owners.

Instead of the owner contracting separately with the architect, interior designer, and the contractor, GlosevSdnBhd select an interior designer and an architect/engineer working together with the owner to plan, design and construct the project to meet the specific goals, constraints and demands.

Solutions that we offer.

Mechanical Engineering

We design and create environments that are comfortable for occupants, economic for customers and efficient with resources. As services we are provide as below:

- Analyze problems to see how mechanical and thermal devices might help solve a particular problem
- Design or redesign mechanical and thermal devices or subsystems, using analysis and computer-aided design.
- Investigate equipment failures or difficulties to diagnose faulty operation and to recommend remedies.
- Develop and test prototypes of devices they design. Analyze the test results and change the design or system as needed.

Electrical Engineering

Design and engineer the right electrical systems, or get it installed, Flatworld Solutions' &electrical engineering services can help you achieve the desired results. We provide a wide range of electrical engineering services at most affordable rates.

Our solutions optimize and integrate all the components of a power system, and make sure that your products are aligned to your business goals.

Services Provides:

- Accountability for the design of a complex electrical system for an oil and gas facility.
- Design or redesign mechanical and thermal devices or subsystems, using analysis and computer-aided design.

Civil Engineering

Our civil engineering teams brings experience and expertise to every project, utilizing thorough research, planning, and creativity to deliver high-quality, practical, and cost-effective solutions to a wide range of clients. Will continue to be a key partner in our country's economic and infrastructure development, develop vibrant living communities and construct national assets of quality and value.

We have been responsible for a complete range of services from preliminary studies, detailed design to the supervision of the final stages of erection.

Our innovative management culture is helping our staff to meet these challenges by combining long term experience with the latest state of the art technological developments.

AUTOMOTIVE ENGINEERING

Creative engineering in the automotive industry involves designing and developing vehicles, components, and manufacturing processes, either individually or in combination. It ensures optimal functionality, efficiency, and safety while considering cost-effectiveness and performance under various conditions.

The Design-Build-Manufacture method is gaining popularity, offering significant time and cost savings. Instead of contracting separately with designers, engineers, and manufacturers, GlosevSdnBhd integrates all parties, working closely with clients to efficiently deliver projects that meet specific goals and market demands.

Solutions that we offer.

Automotive Engineering

We are supply automotive engineering is an important component of the automotive industry. Our engineers able to think creatively and originally to solve specific vehicle-related problems and create new solutions.
